Luxaflex® EDGE Vertical Blind System

NEW
Hardware
Extension

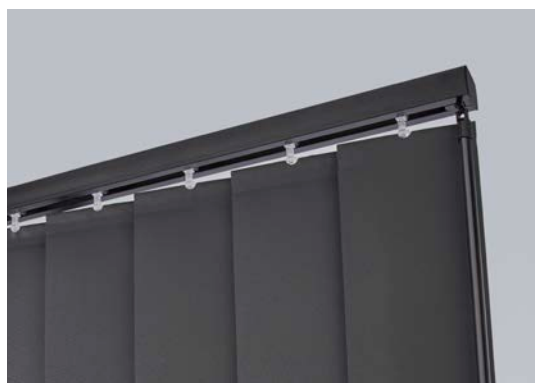

Australian designed and developed, the EDGE Vertical Blind System introduces a new level of style and versatility through a new range of contemporary hardware colours

Inspired by current colour trends in the Australian home interior market, two new stylish hardware colours: Gunmetal and Black have been introduced into the LUXAFLEX® Vertical Blinds range. A premium and highly durable system, EDGE Vertical Blinds now offer complete colour coordination with popular LUXAFLEX® Vertical Blind Fabrics to deliver flexible and comprehensive window covering solutions. Available in two operating options: chain and cord or travelling wand.

NEW HARDWARE COLOUR RANGE

The EDGE Vertical Track is available in 6 hardware colours (anodised, white, birch white, stoney beige, gunmetal and black) and effortlessly colour coordinates with the operating controls.

SEAMLESS COLOUR COORDINATION

Perfectly complement the LUXAFLEX® Caspien Translucent and Warratah vertical fabric collections with the new hardware colour range. For seamless interior harmonisation, coordinate EDGE Vertical Hardware with LUXAFLEX® Roller Blind Bottom Rail colours.

CHAIN AND CORD OPERATION

Featuring a heavy duty beaded chain and cord (available in 4 colours: white, ivory, grey and black), the beaded chain allows you to tilt the blades and gives you complete control for privacy and direction of the light you want in the room.

TRAVERSING WAND OPERATION

The Traversing Wand provides effortless and smooth operation control (available in 4 colours: white, anodised, gunmetal and black). Simply use one hand to tilt the blades and draw across. Opt for earless weights to offer an enhanced child safe solution.
